ABOUT HIS PAINT COMPANY

The roots of this successful organization began with the founder and current COB, Mr. Joe Cox. Joe started HIS Paint Manufacturing Company in April of 1972. For more than 53 years, HIS Paint Manufacturing Company has manufactured premium paints and coatings in their Oklahoma City factories. Today, HIS Paint ships products nationwide and internationally.

Joe began his career in the paint industry in 1960 with Capitol Paint Manufacturing in Oklahoma City. After a short time away from the paint industry, he returned to what he knew best and worked for two other paint and coatings manufacturers from 1964 to 1972. In the process, he was eventually promoted to Vice President of Production for Gemini Lacquers in El Reno, OK before leaving the company in 1972. During this season of life, Joe faced some of his hardest struggles, including an addiction to alcohol. It was during this time that a close friend shared the life-changing message of Jesus Christ. In humility and brokenness Joe prayed and trusted Jesus Christ for salvation and forgiveness of his sins. From the time of his salvation, Joe's life was instantly and radically changed, even more so as he began to trust and depend on God each day for guidance. While still unemployed, Joe was encouraged by his very good friend, Mr. Harry Currie, to begin manufacturing and selling his own line of paint. With Mr. Currie's financial help and counsel, Joe and his wife, Dorothy, started HIS Paint Manufacturing Company. From the beginning, Joe dedicated HIS Paint to the Lord and named it for Him. Thus, the name HIS Paint – means that this is "His" (the Lord's) company. The name alone has opened many doors for Joe to share his story about the life-changing power of a relationship with Jesus Christ. The business began primarily serving the multi-family housing and property management industry as well as professional paint contractors. In the mid-1980s, a recession in the local economy led to exploration into developing new markets. As a result, a niche for custom industrial and specialty coatings was identified; this was the genesis of the Industrial Coatings Group.

HIS Paint saw continued growth in both the architectural and industrial divisions as an Oklahoma paint company. This led to the acquisition of our current facilities at 1801 W. Reno, where our latex manufacturing facility and our corporate offices are located. Our facility at 1700 W. Sheridan is the location of our alkyd manufacturing plant. This warehouse has been remodeled and expanded several times, most recently in 2016, to account for the growth we have experienced within our Industrial Coatings Group. The Sheridan facility currently houses all our industrial manufacturing as well as a state-of-the-art R & D technical coatings laboratory. We currently operate out of two modern manufacturing facilities to better serve our increasingly diverse client base. Today, HIS Paint Manufacturing Company is a full-line manufacturer of both high-quality paints and coatings for all aspects of the architectural and industrial markets. For over 53 years, our products have been distributed on a local, national, and global scale to better serve our wide range of clients and industries

OUR MISSION STATEMENT

- Provide a line of quality products designed to meet the specific needs of consumers
- Provide our clients with prompt and courteous service
- Provide our employees with a positive work environment that promotes fairness, character development, and job skills, all enhanced through a ministry of meeting genuine needs
- Provide a public testimony to the faithfulness of God

Interior Latex Finishes

Our Finest Interior Finish, VALOR is also our “signature” series Interior Acrylic Finish. VALOR contains Bio-Pruff antimicrobial agents for long lasting inhibition of the growth of stain and odor causing bacteria, mold, and mildew on the paint film. Performance benefits include a Low VOC and Low ODOR (VOC<50 g/l) antimicrobial and environmentally friendly finish that is backed by a Lifetime Warranty. VALOR was designed to address the needs of architects, home builders, interior designers, and DIYers who have environmental concerns in their applications. VALOR is ideal for use in healthcare, educational, institutions, retail and commercial buildings, business offices, and residential dwellings.

- Our Finest Interior Acrylic Finish
- Excellent Durability and Interior Surface Protection
- High Hide Paint + Primer
- Antimicrobial Mildew Resistant Finish
- Excellent Scrub, Stain Resistance, Touch Up
- Low Odor - Low VOC (VOC<50 g/l)
- Environmentally Friendly
- Lifetime Warranty
- Easy to Apply - Soap & Water Cleanup

Our “premium” series interior acrylic finish provides a long-lasting and durable coating for interior walls, ceilings, and trim surfaces. IMPERIAL was formulated to provide outstanding interior surface protection and hide. Performance benefits include advanced scrub resistance to make cleaning easy, exceptional spatter and drip resistance, superior touch up properties, and effortless application. IMPERIAL levels out, flows smoothly, and dries quickly with no unpleasant odors while retaining its decorative sheen and color for the life of the paint.

- Outstanding Hide, Durability, and Interior Surface Protection
- Advanced Scrub Resistant Formulation
- Superior Touch Up Properties
- Levels out to a Smooth Finish
- Spatter & Drip Resistant Finish
- No Unpleasant Odors
- Easy to Apply - Soap & Water Cleanup

Our “professional” series Interior Acrylic Finish is designed as a decorative finish with dependable performance and a very low VOC. Good for use on walls, trim, and ceiling surfaces in residential, commercial, and maintenance applications. SELECT can be used on drywall, plaster, masonry, metal, wood, and hardboard. A good choice for living rooms, bedrooms, offices, classroom and much more.

- Decorative Finish
- Easy Application
- Good Touch Up
- Low Odor & VOC
- Easy to Apply - Soap & Water Cleanup

Exterior Acrylic Finishes

Our Finest Exterior Acrylic Paint, MAJESTY is also our “signature” series Exterior 100% Pure Acrylic Paint and provides the ultimate in long term protection and exceptional durability and is backed by a Lifetime Warranty. MAJESTY is both Low Odor and Low VOC (VOC<50 g/l) due to its advanced coating technology. Performance benefits include High-Hide Paint + Primer, 35°F Low Temperature Application, and excellent Stain Blocking. MAJESTY is Blister, Peel, and Color Fade Resistant, as well as, thicker and more flexible than traditional Exterior Acrylic Paint. MAJESTY gives painted surfaces a new look.

- Our Finest Exterior Acrylic Finish
- Lifetime Homeowner’s Warranty
- Excellent Hide / Excellent Performance / Excellent Durability
- Excellent Exterior Surface Protection & Stain Blocking
- Built to Resist Extreme Weather Conditions
- Thicker & More Flexible than Traditional Exterior Paints
- High Hide Paint + Primer + Mildew Resistant
- One Coat Protection / Resistant to Blistering & Peeling
- 35°F (2°C) Low Temperature Application
- Low VOC (VOC<50g/l) / Low Odor / Environmentally Friendly
- Easy to Apply - Soap & Water Cleanup

Our “premium” series 100% Pure Acrylic Exterior Paint is designed to withstand the most challenging elements and extreme weather conditions. COUNTRY CLASSIC is both Low Odor and Low VOC (VOC<50 g/l) due to its advanced coating technology. Performance benefits include outstanding adhesion to wood, metal, and light chalk, outstanding exterior surface protection, color retention, and outstanding flow and leveling. Formulated to resist UV color fade and surface chalking, COUNTRY CLASSIC gives freshly painted exterior surfaces a new look.

- 100% Pure Acrylic Formula
- Outstanding Hide / Outstanding Performance / Outstanding Durability
- Outstanding Exterior Surface Protection
- Built to Resist Extreme Weather Conditions
- Outstanding Adhesion to Wood, Metal & Masonry Surfaces
- Outstanding UV, Fade & Chalk Resistance
- Outstanding Color Retention
- Blister & Peel Resistant
- Mildew Resistant
- Low VOC (VOC<50g/l) / Low Odor / Environmentally Friendly
- Easy to Apply - Soap & Water Cleanup

Our “professional” series Exterior Acrylic Paint is designed to withstand the most extreme weather conditions while providing superior exterior surface protection. REVEAL is both Low Odor and Low VOC (VOC<100 g/l) due to its advanced coating technology. Performance benefits include superior adhesion to wood, metal, and light chalk, allowing it to be used on a wide variety of exterior substrates. REVEAL has superior UV resistance, color resistance and remarkable flow and leveling characteristics. REVEAL gives freshly painted surfaces a new look.

- Superior Hide / Superior Performance & Durability
- Superior Exterior Surface Protection
- Built to Resist Extreme Weather Conditions
- Superior Adhesion to Wood, Metal & Masonry Surfaces
- Superior UV, Fade & Chalk Resistance
- Superior Color Retention
- Blister & Peel Resistant
- Mildew Resistant
- Low VOC (VOC<100g/l) / Low Odor

PRIMER

ACRYLIC

MAJESTY H1900 ACRYLIC PRIMER

Our finest 100% Pure Acrylic Primer provides the ultimate in long term protection and durability. durability. Designed for use with either latex or alkyd house paints on both new or repaint exterior surfaces. Ideal for use on properly prepared surfaces such as new redwood, cedar, and other woods that tend to bleed as well as galvanized steel and other non-ferrous metal surfaces. Provides excellent stain blocking performance on rust and rosin areas and excellent protection on mildew problem areas. Very effective in resisting staining and discoloration discoloration caused by tannins in most woods. Performance benefits include High-Hide Primer, 35°F Low Temperature Application, and excellent Stain Blocking. Low Odor and Low VOC (VOC<50 g/l) due to advanced coatings technology.

ITEM	DESCRIPTION
H1900	MAJESTY EXTERIOR ACRYLIC PRIMER

ACRYLIC

REVEAL H1700 ACRYLIC PRIMER

Our “professional” series Exterior Acrylic Primer is designed to withstand the most extreme weather conditions while providing excellent exterior surface protection. H1700 is both Low Odor and Low VOC (VOC<100 g/l) due to our innovative coatings technology. Performance benefits include excellent adhesion to new or previously painted wood exterior substrates. H1700 has superior UV resistance and outstanding flow and leveling characteristics.

ITEM	DESCRIPTION
H1700	REVEAL EXTERIOR PRIMER

PVA PRIMER

ACRYLIC

LEVEL 5 HIGH BUILD PVA PRIMER

K988 is a high quality interior PVA primer surfacer designed to smooth imperfections and uniform wallboard surfaces. It can be used to help achieve a level 5 finish without the use of a skim coat.

ITEM	DESCRIPTION
K988	INTERIOR LEVEL 5 PRIMER/SEALER

PVA

405 PVA PRIMER

H5099 is our professional series pigmented vinyl acrylic latex primer/sealer (PVA Primer) formulated to seal porous interior surfaces such as new drywall, plaster, masonry, block, brick, wood, and wallboard. H5099 PVA Primer provides maximum enamel holdout for either flat or enamel or latex or alkyd topcoats. H5099 PVA Primer is especially recommended for unpainted interior drywall surfaces such as walls and ceilings, as it will not raise the nap (surface fibers) and prevents sheen variation in finish coats. H5099 PVA Primer has been designed for use with all HIS Paint Interior Acrylic Latex topcoats providing a complete primer and topcoat system.

ITEM	DESCRIPTION
H5099	405 INTERIOR PVA PRIMER/SEALER

PVA

950 PVA PRIMER

950 is a high-quality interior primer and sealer designed to meet the needs of the new construction market. Designed to uniform surfaces while providing good hide and sheen holdout. It can be used on drywall, concrete, plaster, and some wood surfaces.

ITEM	DESCRIPTION
K950	950 INTERIOR PVA PRIMER/SEALER

UNDERCOATER

ACRYLIC

QUICKSAND UNDERCOATER

A fast drying, easy sanding, and low odor undercoater. Use as a basecoat for pigmented finishes.

ITEM	DESCRIPTION
H5775	QUICKSAND UNDERCOATER

ALKYD

STAINBLOCKER PRIMER & UNDERCOATER

A fast drying, high build, pigmented alkyd primer/sealer developed to replace pigmented shellac sealers. Effectively seals off bleeding water stains, kitchen grease, crayon, ink, pencil, smoke, etc. on interior wood, gypsum board, plaster, walls and ceilings. 9270 makes an excellent high build under coater for use on interior wood trim surfaces and cabinets by drying quickly and sanding easily to a smooth finish.

ITEM	DESCRIPTION
H9270	STAINBLOCKER PRIMER & UNDERCOATER

SEALER COATING

ACRYLIC

AQUA GLAZE CLEAR COATING

A clear waterborne acrylic gloss coating designed to protect previously painted interior wall surfaces in high traffic areas. Aqua Glaze dries to an extremely hard and durable non-yellowing clear protective finish. H3000 series Aqua Glaze can also be used for post removal asbestos treatment.

ITEM	DESCRIPTION
H3000	AQUA GLAZE SEALER GLOSS

ACRYLIC

CLEAR WALL SIZE

A non-pigmented acrylic latex primer/sealer designed to seal interior surfaces before application of wall coverings on new drywall and sheet rock substances. H7005 provides a strong adhesive surface for vinyl wall covering adhesive. Allows finished wall coverings to have a more uniform adhesion and appearance.

ITEM	DESCRIPTION
H7005	CLEAR WALL SIZE

POOL PAINT

VINYL

SWIMMING POOL PAINT

A chlorinated vinyl toluene-acrylate low luster coating designed for use on unpainted or previously painted concrete swimming pools. Makes cleaning easier and facilitates inspection for cleanliness and maintenance needs. Will smooth the rough surfaces of concrete and reduce chances of abrasion and scratches to bathers. Protects concrete surfaces that can slowly disintegrate from exposure to weather and water. Use mineral spirits or paint thinner for a reducer and/or cleanup solvent

ITEM	DESCRIPTION
H9820	SWIMMING POOL PAINT WHITE
H9830	SWIMMING POOL PAINT LIGHT BLUE
H9831	SWIMMING POOL PAINT DARK BLUE

TEXTURE KOTE | STUCCO KOTE | BLOCK FILLER

ACRYLIC

TEXTURE KOTE (SPRAY)

A high performance, high build, decorative acrylic latex texture coating designed for spray application on properly prepared interior or exterior concrete, cinder block, drywall, plywood, and metal surfaces. The pleasing texture bridges minor hairline cracks and minimizes defects and irregularities found on poured concrete and block substrates. The heavy bodied finish provides long-term protection against driving rain and weathering. Meets Gov't Spec. TT-C-555B.

ITEM	DESCRIPTION
H6000	SPRAY APPLIED TEXTURE-KOTE

ACRYLIC

STUCCO KOTE (TROWEL)

A high performance, high build, decorative acrylic latex texture coating designed for trowel application on both interior and exterior surfaces. Enhances the aesthetic appearance of any building when troweled on concrete, block, stucco, or wood surfaces. This heavy bodied, high performance texture coating has a decorative stucco look with a weather and scratch resistant surface. Provides long term protection against driving rain and weathering. Performance alternate for Gov't Spec. TT-C-555B.

ITEM	DESCRIPTION
H6500	TROWEL APPLIED STUCCO COATING

ACRYLIC

BLOCK FILLER

A premium series, high solids, acrylic latex block filler designed for use whenever a heavy-duty block filler is needed on interior or exterior walls or surfaces. Fills masonry pores and voids with minimum pin holing to provide a uniform finish for the topcoat. H7800 can be used under a variety of interior and exterior topcoats including a waterborne epoxy and MasterTouch 9850 Polyamide Epoxy coatings.

ITEM	DESCRIPTION
H7800	ACRYLIC LATEX BLOCK FILLER

DRYFALL | ELASTOMERIC COATINGS

ACRYLIC

DRYFALL

An acrylic latex dryfall coating with fast drying overspray characteristics designed for those special applications where a high performance dryfall coating is required. This product provides quick finishing or refinishing of large exterior or interior industrial, commercial, or institutional ceilings, girders, beams, trusses, or wall areas. A high hiding formulation that covers most surfaces in one coat. 33W01 Series is washable with an extremely durable finish. Resists dirt pickup, dirt retention, and fume discoloration. Minimizes cover up and clean up expenses. In normal conditions of application, the overspray from this coating falls to the floor as a dry dust which may be swept up without damaging the surface.

ITEM	DESCRIPTION
33B01	LATEX DRYFALL EGGSHELL BLACK
33W01	LATEX DRYFALL EGGSHELL WHITE
33W50	LATEX DRYFALL SEMIGLOSS WHITE

ACRYLIC

ELASTOMERIC ROOF COATING

An elastomeric acrylic, pigmented, high solids coating designed to prolong the life of existing roof structures and protect against water penetration. Besides creating a vapor barrier, this heavy bodied elastomeric system provides excellent flexibility, durability, and long term protection against water pooling and extreme temperatures. H1019's white finish reflects the heat created from the sun and reduces both building structure temperature and interior cooling expenses. H1019 is non-flammable and emits no hazardous vapors.

ITEM	DESCRIPTION
H1019	ELASTOMERIC ROOF COATING WHITE

ACRYLIC

ELASTOMERIC PRIMER

An elastomeric acrylic high solids clear primer designed to provide a foundation for superior adhesion on substrates with marginal adhesion. H1015 Clear Primer is the base coat in the Elastokote Elastomeric Roofing System. H1015 forms a non-permeable water tight seal over asphalt, steel, galvanized metal, wood, and concrete. Applied properly, H1015 will help emulsify any loose particles, that were missed during clean up, into the primer.

ITEM	DESCRIPTION
H1015	ELASTOMERIC CLEAR PRIMER

ELASTOMERIC MASONRY COATINGS

ACRYLIC

VERTICAL MASONRY COATING

An elastomeric acrylic high-solids pigmented coating designed to protect vertical interior or exterior surfaces, such as tilt-up concrete, concrete block, and masonry walls against water penetration. H1020 provides a durable finish with the elongation and recovery properties necessary to bridge dimensionally unstable cracks without rupturing. Besides bridging hairline cracks, it creates a vapor barrier. H1030 is permeable to water vapor which controls moisture build up in walls. The flat, textured, high performance finish visually softens surface irregularities for a uniform appearance.

ITEM	DESCRIPTION
H1020	ELASTOMERIC MASONRY WALL COATING <i>Meets Govt Spec. TTC-555B</i>

ACRYLIC

TEXTURED VERTICAL MASONRY COATING

A Textured elastomeric acrylic high-solids pigmented coating designed to protect vertical interior or exterior surfaces such as tilt-up concrete, concrete block, or masonry walls against water penetration. H1030 provides a durable textured finish with the elongation and recovery properties necessary to bridge dimensionally unstable cracks without rupturing. Besides bridging hairline cracks, it creates a vapor barrier. H1030 is permeable to water vapor which controls moisture build up in walls. The flat, textured, high performance finish visually softens surface irregularities for a uniform appearance.

ITEM	DESCRIPTION
H1030	TEXTURED ELASTOMERIC MASONRY WALL COATING <i>Meets Govt Spec. TTC-555B</i>

ACRYLIC

ACRYLIC MULTI-SEAL

An elastomeric acrylic high solids clear primer coating designed to provide a foundation for better adhesion on substrates with marginal adhesion. H1021 is the primer/base coat for use with the 1020 Series Elastokote Elastomeric Vertical Masonry Coating and 1030 Series Textured Elastomeric Vertical Masonry System. H1021 can be used with 7800 Series Block Filler for deep penetration into block walls. It may also be used to seal exterior clay, brick, concrete, or cinder block mortar joint surfaces before top coating with HIS Exterior Paint.

ITEM	DESCRIPTION
H1021	ACRYLIC MULTI-SEAL CLEAR

ZONE & FIELD MARKING PAINT

ACRYLIC

WATERBORNE ZONE MARKING PAINT

A premium fast drying waterborne acrylic zone marking traffic paint that delivers an extremely durable, abrasion resistant, and dirt pickup resistant finish. 34 Series may be used for marking lanes and striping areas on concrete or asphalt trafficbearing surfaces. 34 Series is excellent for marking highway, airport, parking lot, or industrial road traffic lanes and is perfect for those state, county, and municipalities that require lead chromate free pigments in their zone marking paint. It's extremely durable and fast drying finish will provide both safety and long service to traffic areas.

ITEM	DESCRIPTION	ITEM	DESCRIPTION
34Y10	WB TRAFFIC MARKING PAINT YELLOW	34E10	WB TRAFFIC MARKING PAINT BLUE
34R10	WB TRAFFIC MARKING PAINT RED	34B10	WB TRAFFIC MARKING PAINT BLACK
34W10	WB TRAFFIC MARKING PAINT WHITE	34D10	WB TRAFFIC MARKING PAINT GREEN

ALKYD

ALKYD TRAFFIC PAINT

A high solids alkyd zone marking paint designed for interior or exterior use for marking lanes or areas on concrete or asphalt surfaces. Excellent for marking highway, airport, parking lot, or industrial road traffic lanes. Created for those state, county, and municipalities that require lead chromate free pigments in their zone marking paint. Designed primarily for spray application in most types of line spray equipment. It's extremely durable and fast drying finish will provide both safety and long service to traffic areas.

ITEM	DESCRIPTION
88Y10	ALKYD ZONE MARKING PAINT YELLOW
88W10	ALKYD ZONE MARKING PAINT WHITE
88R10	ALKYD ZONE MARKING PAINT RED

ACRYLIC

WATERBORNE ATHLETIC FIELD MARKING PAINT

A waterborne acrylic paint designed for athletic field marking and formulated as a high hiding, durable, dew and fog resistant coating. When properly used, it is harmless to grass and participants. This product may be used on all types of athletic fields and sporting areas including football fields, baseball diamonds, soccer fields, and running tracks

ITEM	DESCRIPTION
32W01	LATEX FIELD MARKING PAINT WHITE

WOOD FINISHES (INTERIOR)

ALKYD

ALKYD INTERIOR GLAZING LIQUID

A richly pigmented alkyd glazing liquid designed to give greater depth of color and accent to interior wood grain. Accents and distresses the wood grain giving it a contrasting effect around carvings, grooves, and fine detail work. Used to achieve the beautiful hand detailed finishes of fine furniture. Should only be used following the application of a water clear or pigmented sealer. Designed as the third or fourth step in the wood finishing system. Recommended for application over sealed wood surfaces ONLY. Must be top coated with a water clear finish or the glazing liquid will not completely dry. INTERIOR USE ONLY

ITEM	DESCRIPTION
------	-------------

H8840	MASTERTOUCH GLAZE WHITE
-------	-------------------------

Available in 8840 White, 8841 Van Dyke Brown, 8842 Raw Umber, 8843 Burnt Umber, 8844 Clear, 8846 Bill's Brown, 8840 Series Glaze can be used as a Wall Glaze if combined with 81C01 Glaze Hardener.

ALKYD

QUICK DRY ALKYD INTERIOR TRIM ENAMEL

A quick drying alkyd enamel designed exclusively for residential, commercial, institutional, and industrial new construction and remodel interior wood trim applications. Typical uses include interior wood trim, molding, doors, and cabinets. Dries quickly to a yellow resistant, very hard, extremely durable, and protective Eggshell finish that gives wood surfaces a beautiful and exceptionally finished appearance. Because it dries more quickly than ordinary alkyd enamels, 78W01 Series Enamel is designed for spray application only. However, very small areas may be brushed. INTERIOR USE ONLY

ITEM	DESCRIPTION
------	-------------

78W01	QD ALKYD INTERIOR EGGSHELL
-------	----------------------------

79W01 Series Semigloss Finish also available

ALKYD

QUICK DRY INTERIOR OIL WOOD STAIN BASE

A fast drying Oil Stain designed to accent and highlight grain definition and the natural beauty of wood products. Intended for use on architectural wood substrates in residential, commercial, institutional, and industrial new construction and refinishing. Penetrates bare wood, resists lap marks, causes minimal grain raising of new wood. This is a fast production stain system. One coat of stain and two finish coats can be completed in 8 hours. The stain can be top coated in 2 hours with most clear solvent-borne alkyd, urethane, lacquer topcoats. Wait 6 hours with waterborne topcoats.

ITEM	DESCRIPTION

85A00	QD INT WOOD STAIN CLEAR BASE
-------	------------------------------

*HIS Paint Manufacturing Company | Subject to Stock on Hand | Not Responsible for Typographical Errors or Omissions
HIS Paint Reserves Right to Correct Errors at Point of Sale*

WOOD FINISHES (INTERIOR)

ALKYD

QD ALKYD OIL STAIN EXTENDER BASE

A fast drying EXTENDER BASE designed ONLY to be used as an extender with MasterTouch 85A00 Series QD Interior Oil Wood Stain Clear Base. Works with 85A00 Stain base to accent and highlight grain definition and the natural beauty of wood products. This product is NOT formulated and NOT intended to be used as an extender with any other products. 85C01 EXTENDER is part of a fast production stain system. A coat of stain and two finish coats can be completed in 8 hours. The stain can be top coated in 2 hours with most clear solvent-borne alkyd, urethane, lacquer topcoats (6 hrs waterborne topcoats).

ITEM	DESCRIPTION
85C01	QD WOOD STAIN EXTENDER BASE

ALKYD

POLYURETHANE VARNISH

A premium series polyurethane finish that will meet any requirement for interior applications where a urethane is needed. Will not soften from heat. Resists abrasion, weathering, water spotting, fruit acids, oils, gasoline, humidity, etc. Protects commercial, institutional, and residential wood floors, doors, furniture, cabinets, and trim. Enhances wood grain and color.

ITEM	DESCRIPTION
H8810	POLYURETHANE FINISH CLEAR GLOSS <i>Available in two 8810 Gloss and 8812 Satin Finishes. Not recommended for exterior applications</i>

ALKYD

MARBLE-LIKE WALNUT VARNISH

A pigmented polyurethane varnish stain that protects and beautifies new and previously painted, stained, or varnished interior wood surfaces. 8830 MLW Varnish provides excellent resistance to abrasion and added protection against alcohol, water, and most household chemicals. Designed to protect commercial and institutional wood trim, doors, furniture, and cabinets. May also be used as a protective coating over previously painted or stained surfaces. 8830 Series Marble-Like Varnish greatly enhances wood grain and color.

WOOD FINISHES (INTERIOR)

ALKYD

GYM FINISH

An extremely durable clear gloss polyurethane finish and sealer developed primarily for interior wood surfaces subjected to moisture, scuffing, marring, oils, gasoline, 8801 Gym Finish will not soften under heat. Enhances wood grain and color. Not recommended for exterior applications.

ITEM	DESCRIPTION
H8801	GYM FLOOR FINISH HIGH GLOSS

WOOD FINISHES (EXTERIOR)

ALKYD

SEMI-TRANSPARENT WOOD STAIN

A semi-transparent, non-wiping, oil stain and sealer designed to penetrate and beautify exterior wood surfaces and provide them with superior protection against the harsh elements of weather. MasterTouch H8877 Stain beautifies and enriches the natural beauty of wood surfaces by allowing the grain, texture, and color variations beauty of wood surfaces by allowing the grain, texture, and color variations within the wood to show through. When properly applied, is water repellent, mildew resistant, and won't peel, blister, or crack. Built in UV blockers provide extra protection against deterioration on wood surfaces.

ITEM	DESCRIPTION
H8877	EXTERIOR WOOD STAIN CLEAR <i>Available in H8874 Shaker, H8875 Dark Oak, H8876 Cedartone, H8877 Clear, & H8878 Walnut</i>

ALKYD

SOLID COLOR WOOD STAIN

A richly pigmented, high hiding, solid-color alkyd wood finish that is designed to beautify and protect exterior wood surfaces against the elements. Color coats in one application without filling in or otherwise altering the natural texture of exterior wood surfaces such as decks, porches, shingles, shakes, siding, and fences.

ITEM	DESCRIPTION
H8852	EXTERIOR SOLID COLOR WOOD STAIN <i>Various Colors Available</i>

WOOD FINISHES (EXTERIOR)

ACRYLIC

SEMI-TRANSPARENT WOOD STAIN

48 Series Oil/Latex Exterior Semi-Transparent Stains formulated with alkyd modified acrylic technology for excellent are weathering and long-term UV fade resistance. Available in custom tint bases that can be tinted to designer colors. As a true semi-transparent stain, 48 Series semi-transparent formulation allows some wood grain to show through, while providing excellent protection. As a solid stain, the wood grain is shielded. Cleans up easily with soap and water.

ITEM	DESCRIPTION
48P00	WB SOLID COLOR STAIN <i>Available in 48P00 Solid Base to tint various colors</i>

ACRYLIC

SOLID WOOD STAIN

48 Series Oil/Latex Exterior Solid Stains formulated with alkyd modified acrylic technology for excellent are weathering and long-term UV fade resistance. Available in custom tint bases that can be tinted to designer colors. As a true semi-transparent stain, 48 Series semi-transparent formulation allows some wood grain to show through, while providing excellent protection. As a solid stain, the wood grain is shielded. Cleans up easily with soap and water.

ITEM	DESCRIPTION
48A11	WB SEMITRANS STAIN <i>Available in 48A11 Solid Base to tint various colors</i>

ALKYD

ALKYD WOOD PRIMER

A pigmented exterior alkyd primer formulated for priming and sealing new wood, weathered wood, and reconditioning previously painted wood. 8200 is fast drying and can be top coated in just one and can be top coated in just one hour. Ideal for use on redwood, cedar, and other woods that tend to bleed. Provides excellent stain blocking performance on rust and rosin areas and excellent protection on problem mildew areas. Suitable for use with either latex or alkyd topcoats. A performance alternate for Gov't. Spec. TT-P-25E.

ITEM	DESCRIPTION
H8200	EXTERIOR ALKYD WOOD PRIMER WHITE

ONE-COMPONENT ENAMEL

ACRYLIC

GTX WATERBORNE ACRYLIC ENAMEL

GTX is a high-performance waterborne enamel designed to replace solvent-based coatings on properly prepared exterior and interior surfaces. properly prepared exterior and interior surfaces. 45 Series GTX WB Enamel was created for a healthier working environment with the safety of the applicator and those in the immediate working area as a priority. GTX Enamel is an excellent low odor replacement for solvent-based coatings and provides an extremely hard, durable, flexible finish with excellent adhesion to a variety of surfaces found in residential, commercial, and institutional applications.

ITEM	DESCRIPTION
45 SERIES	GTX WB ACRYLIC

Available in Eggshell, Satin & Semi-Gloss

ACRYLIC

GTX WATERBORNE DTM ACRYLIC ENAMEL

Metal (DTM) waterborne acrylic enamel designed to replace solvent-based coatings in exterior or interior industrial, commercial, institutional, and residential applications. This WB system was created for a healthier working environment with the safety of the applicator and those in the immediate working area as a priority. It is fast drying, non-yellowing, extremely durable, and provides a beautiful finish with the look and feel of an expensive alkyd. Aqua Enamel has an extremely durable finish with excellent to a variety of surfaces including bare metal, wood trim solvent-based paint, polyurethane, and lacquer surfaces. On bare metal surfaces, use GTX Primer prior to applying GTX topcoat.

ITEM	DESCRIPTION
55 SERIES	GTX WB ACRYLIC DTM

Available in Satin, & Semi-Gloss

ACRYLIC

WATERBORNE ENAMEL

16 Series waterborne enamels are high performance acrylic urethane enamel designed for excellent durability, adhesion and block resistance. Perfect for use in high performance architectural and light industrial applications. 16 Series can be used on drywall, masonry, metal, wood and hardboard. An excellent choice for kitchen cabinets, entry doors, furniture, hand rails, floors, and much more.

ITEM	DESCRIPTION
16 SERIES	16 SERIES WB POXY

Available in Eggshell, Satin, & Semi-Gloss

ONE-COMPONENT URETHANE

URETHANE

GTX WATERBORNE URETHANE

GTX is a high-performance, low VOC, urethane reinforced acrylic designed to replace solvent-based coatings on properly prepared kitchen and bathroom cabinets, shelving, furniture, trim, and crown molding. 65 Series GTX creates a smooth, factory-like finish and offers superior adhesion and delivers excellent flow and leveling, while providing superior stain resistance. This durable urethane provides years of protection in a low odor formulation.

ITEM	DESCRIPTION	
65 SERIES	GTX ACRYLIC URETHANE	<i>Available in Satin & Semi-Gloss</i>

TWO-COMPONENT WATERBORNE EPOXY

EPOXY

WATERBORNE EPOXY

Master Glaze is a waterborne epoxy coating that's designed for maintenance. This two-component epoxy is suitable for use as a general maintenance coating in industrial environments. It can be used on steel, galvanized and non-ferrous metals, concrete, masonry, and previously coated surfaces. Master Glaze is a low VOC product and has a low odor, which makes it ideal for use in schools, food service areas, schools, healthcare facilities, and hotels. Its durable finish makes it an ideal product for walls and other surfaces exposed to frequent washing and cleaning.

ITEM	DESCRIPTION
68 SERIES	MASTER GLAZE WATERBORNE EPOXY

ONE-COMPONENT ENAMEL

ALKYD

ACRYLIC MODIFIED ALKYD ENAMEL (GLOSS)

A premium series Gloss alkyd enamel designed to provide a very tough, durable, semigloss sheen finish for a wide variety of interior or exterior substrates including wood and ferrous metal surfaces. 80 Series Gloss is formulated for high hide, excellent sag resistance, flow and leveling, and wet edge retention. This extremely durable product is a single component, but can be cross-linked with our 8000 Polyurethane Converter when stringent specs require extra protection, color retention, and corrosion resistance. 80 Series Gloss meets Gov't. Specs TT-E-489G and TTE-506K.

ITEM	DESCRIPTION
80 SERIES	ALKYD GLOSS ENAMEL

Available in White, Black, Gray, Safety Colors & Tintable Bases

ALKYD

ACRYLIC MODIFIED ALKYD ENAMEL (SEMI-GLOSS)

A premium series Semigloss alkyd enamel designed to provide a very tough, durable, semigloss sheen finish for a wide variety of interior or exterior substrates including wood and ferrous metal surfaces. 81 Series Semigloss is formulated for high hide, excellent sag resistance, flow and leveling, and wet edge retention. This extremely durable product is a single component, but can be cross-linked with our 8000 Polyurethane Converter when stringent specs require extra protection, color retention, and corrosion resistance. 81 Series Semigloss meets Gov't. Specs TT-E-529C and TT-E-509.

ITEM	DESCRIPTION
81 SERIES	SEMIGLOSS ALKYD ENAMEL

Available in Various Colors & Tintable Bases

ALKYD

ACRYLIC MODIFIED ALKYD ENAMEL (EGGSHELL)

A premium series Eggshell alkyd enamel designed to provide a very tough, durable eggshell sheen finish for a wide variety of interior or exterior substrates including wood and ferrous metal surfaces. 82 Series Eggshell is formulated for high hide, excellent sag resistance, flow and leveling, and wet edge retention. When brushed, it has the appearance of a sprayed on silky eggshell finish. This extremely durable product is single component, but can be cross-linked with our 8000 Polyurethane Converter when stringent specs require extra protection, color retention, and corrosion resistance. Meets Gov't. Specs. TT-E-509B, TT-E-508C, TT-E-001793, and TT-E-529F.

ITEM	DESCRIPTION
82 SERIES	EGGSHELL ALKYD ENAMEL

Available in Various Colors & Tintable Bases

HIS Paint Manufacturing Company | Subject to Stock on Hand | Not Responsible for Typographical Errors or Omissions

ONE-COMPONENT ENAMEL

ALKYD

RUST INHIBITIVE METAL PRIMER

A high performance, rust inhibitive, alkyd metal primer that provides excellent corrosion resistance, wetting ability, flexibility, and adhesion on clean and tightly adhering rust and mill scale in normal service environments. 8205 can be brush, roll, spray, or dip applied on interior or exterior ferrous metal surfaces. Use with 80 Series alkyd enamel topcoats. Not to be used as a universal primer/barrier coat underneath vinyl, epoxies, lacquers, or other strong solvent containing finishes. Dries tack free in about 3 to 4 hours.

ITEM	DESCRIPTION
H8205	RUST INHIBITIVE ALKYD METAL PRIMER <i>Available in Red Oxide</i>

ALKYD

QUICK DRY ALKYD ENAMEL

A high performance, fast drying acrylic modified alkyd enamel designed for the segment of the OEM market that requires extra protection from the elements. Generally used as an industrial paint finish for OEM applications on a variety of metal substrates where performance and dry time are essential factors in production. Acrylic modification makes this alkyd enamel perform much better than conventional alkyd enamels in the areas of durability, adhesion, color retention, flexibility, sag resistance, and wet edge retention. This high-performance product can be crosslinked with our 8000 Polyurethane Converter for even greater performance in heavy corrosion applications. CONTAINS NO LEAD, CHROME, OR OTHER HEAVY METAL COMPOUNDS.

ITEM	DESCRIPTION
90 SERIES	QD ALKYD ENAMEL GLOSS <i>Available in White, Black, Gray, Safety Colors & Tintable Bases</i>

ALKYD

QUICK DRY, RUST INHIBITIVE METAL PRIMER

A high performance, quick dry, corrosion resistant universal metal primer containing rust inhibitive pigments for interior and exterior applications. This TTP-664 primer may be used applications. This TTP-664 primer may be used as a barrier coat to permit vinyls, epoxies, or other strong solvent containing top coats to be other strong solvent containing top coats to be applied. Adheres tightly to clean metal and to topcoats. CONTAINS NO LEAD, CHROME OR ANY OTHER HEAVY METAL COMPOUNDS.

ITEM	DESCRIPTION
92 SERIES	QD INDUSTRIAL PRIMER <i>Available in White, Gray, Dark Gray & Red Oxide</i>

ONE-COMPONENT ENAMEL

ALKYD

HIGH HEAT SILICONE ENAMEL

A high performance, fast drying silicone modified flat black enamel designed for high temperature applications that require a coating to withstand continuous temperatures of 1000° F and surges up to 1200° F with no loss of adhesion. This high-performance product is single component and meets VOC regulations of 5.42 lbs/gallon (650g/l) for high temperature coatings.

ITEM	DESCRIPTION
H8314	HIGH HEAT 1200 DEGREE BLACK

ALKYD

CHASSIS BLACK ENAMEL

A high solids black enamel designed for use on metal or concrete substrates where a water and corrosion resistant protective coating is required. H9010 Chassis Black is widely used to protect steel beams, steel pipes, and other metal parts while in storage. Ideally suited for underbody automotive applications, pipe coating, burial vault coating, or other underground protective coating applications where gloss retention is not critical. Unlike other asphalt-based products, H9010 Chassis Black is non-settling and will not settle in the bottom of a dip tank. H9010 dries quickly to a pleasing glossy black finish similar to an enamel paint finish unlike other asphalt-based products which dry slow and leave a sticky-tar-like finish. *This product is supplied below 3.5 lb/gallon VOC.*

ITEM	DESCRIPTION
H9010	BLACK CHASSIS ENAMEL

HARDENER AND CATALYST

ALKYD

POLYURETHANE CONVERTER

For the ultimate protection, add 8000 Polyurethane Converter to our 80, 90 or 95 Series Alkyd Enamels to get a slick, wet, automotive type finish and an incredibly tough, hard, and chemical and corrosion resistant finish. 8000 increases the coating's initial and long-term gloss, color retention, flexibility, impact resistance, abrasion resistance, and chemical and solvent resistance and accelerates their drying and curing times. 8000 works by chemically cross-linking with the alkyd enamel. (Mix 1 pint 8000 Poly Converter per 1 gallon of paint for best results). Mixed material will have a 24-hour pot life.

ITEM	DESCRIPTION
H8000	ALKYD HARDENER/POLY CONVERTER

ACRYLIC

ACRYLIC HARDENER

Add 8001 Acrylic Hardener to our 80, 90, or 95 Series Alkyd Enamels. 8001 will improve the coating's initial and long-term gloss, color retention, flexibility, increase retention, flexibility, increase hardness, and speed "tack free" dry time. (Mix 1 pint 8001 Acrylic Hardener per 1 gallon of paint for best results). Pot life is not a factor with this 8001 Acrylic Hardener.

ITEM	DESCRIPTION
H8001	ACRYLIC HARDENER

ALKYD

URETHANE CATALYST

8002 Urethane Catalyst is specifically formulated to be mixed as an activator with MasterThane 7150 Series & 72W05 Series two-component Urethane Finishes. 8002 Activator must be added to and mixed with 71 or 72 Series Urethane or the urethane coatings will not dry, harden, or cure. 8002 Urethane Catalyst is a high-solids, high-viscosity activator designed for conventional use. 8002 Urethane Catalyst may also be used with 90 & 92 Series Quick Dry Alkyd Enamels & Primers to improve the initial and long-term gloss, color retention, flexibility, impact resistance, abrasion resistance, and chemical and solvent resistance.

ITEM	DESCRIPTION
H8002	URETHANE ACTIVATOR

TWO-COMPONENT URETHANE

URETHANE

NON-SKID URETHANE

A high performance Non-Skid Urethane coating that is designed for the segment of the OEM market that requires extra skid protection from the elements. Generally used as an industrial paint finish for OEM applications on a variety of metal substrates where performance and dry time are essential factors in production. This single component, fast drying, product can be crosslinked with our H8000 Polyurethane Converter for even greater performance in heavy corrosion applications. CONTAINS NO LEAD, CHROME OR OTHER HEAVY METAL COMPOUNDS.

ITEM	DESCRIPTION
88B03	ANTI-SLIP URETHANE BLACK

URETHANE

ANTI-GRAFFITI URETHANE

A non-sacrificial, two-component, acrylic urethane anti-graffiti coating system designed for the ultimate protection against graffiti, harsh chemicals, solvents, chalking, and severe environmental elements. 70C01 is the ultimate coating in color and gloss retention and is extremely tough and abrasion and chemical resistant. Will enhance the appearance and extend the life of a variety of surfaces that can be easily maintained. *Available in Clear or Pigmented*

ITEM	DESCRIPTION
70C01	ANTI-GRAFFITI URETHANE CLEAR

ACRYLIC

ANTI-GRAFFITI URETHANE

A two-component, anti-graffiti, acrylic urethane system designed to produce a "Tile Like" surface on substrates that are normal targets for graffiti. The properties of the surface allow aerosol paint and permanent marker graffiti to be cleaned off the surface without repainting. 72 Series is the ultimate coating in color and gloss retention. This non-sacrificial coating is a tough, abrasion and chemical resistant finish and also excels in the areas of gloss and color retention by outlasting conventional coatings in severe sun exposure by 3 to 1. 72 Series Anti-Graffiti Coating must be catalyzed 1:1 with H8005 VOC Compliant Urethane Catalyst or H8015 Urethane Catalyst.

ITEM	DESCRIPTION
72C06	CLEAR ANTI-GRAFFITI TOP COAT

TWO-COMPONENT URETHANE

ACRYLIC

HIGH SOLIDS ACRYLIC URETHANE

A two-component, high solids, VOC compliant, hybrid acrylic urethane system designed to produce a highly weatherable, durable, washable, and flexible finish for the high performance coatings market. 72 Series is the ultimate coating in color and gloss retention. This tough, abrasion resistant finish performs its best in the areas of gloss and color retention by outlasting conventional coatings in severe sun exposure by 3 to 1. 72 Series must be catalyzed with H8015 Urethane Catalyst. Mix ratio is 1 part base to 1 part catalyst, by volume. H8015 catalyst is included with product.

ITEM	DESCRIPTION
72 SERIES	ACRYLIC URETHANE

ACRYLIC

DTM URETHANE

A two component, high solids, high-build, V.O.C. compliant, hybrid acrylic mastic urethane system designed to produce a highly weatherable, durable, and flexible finish for the high performance coating markets. 74 Series is the ultimate coating in color and gloss retention. This tough, abrasion resistant finish performs its best in the areas of gloss and color retention by outlasting conventional coatings in severe sun exposure by 3 to 1. 74 Series must be catalyzed with 8015 Urethane Catalyst only

ITEM	DESCRIPTION
74 SERIES	DTM URETHANE <i>Gloss and satin finishes available.</i>

ACRYLIC

ALIPHATIC ACRYLIC URETHANE

A two-component, aliphatic acrylic urethane system designed to produce a highly weatherable, durable, and flexible finish for the high-performance coating markets. H7150 Series Urethane is the ultimate coating in color and gloss retention. It's tough, "tile-like", abrasion resistant finish performs its best in the areas of gloss and color retention by outlasting conventional alkyds in severe sun exposure. Catalyze with H8002 Urethane Catalyst. Mix 1 Pint H8002 catalyst per 1 gallon of H7150 Urethane (7:1 Mix Ratio). H8002 Catalyst (1 Pint) is included with product. Mixed material will have a 4-6 hour pot life.

ITEM	DESCRIPTION
H7150	ACRYLIC URETHANE GLOSS <i>Available in Gloss and Satin Finishes</i>
